SBA Office of Investment & Innovation
SBIR-STTR Presentation

OCTOBER 2015

Small Business Administration

Office of Investment and Innovation

What do we actually do?

In the Small Business Act of July 30, 1953, Congress created the Small Business Administration, whose function is to "aid, counsel, assist and protect, insofar as is possible, the interests of small business concerns." The charter also stipulates that SBA would ensure small businesses a "fair proportion" of government contracts and sales of surplus property.

“3 C’s & a D”— *capital, contracting, counseling, & disaster*

SBA-OII primary work w/ 11 participating federal agencies on efforts related to the 3C’s from both policy and programmatic oversight.

SBA Leadership Flowchart

Elevator Pitch

Small Business Administration Office of Investment and Innovation

SBA's Office of Investment and Innovation (OII) leads programs that provide the high-growth small business community with access to two things: financial capital and R&D funds to develop commercially viable innovations.

Our work is underpinned by public-private partnerships that operate on or along a very dynamic and economically important intersection.

Small Business Investment Company (SBIC) Program delivers access to financial capital

\$4 billion authorization per year | \$23.78 billion of assets under management | 299 active SBICs

Small Business Innovation Research (SBIR) and Small Technology Transfer Research (STTR) programs support the R&D + financing of cutting-edge technologies

~\$2.2 billion annual set aside | ~145,000 awards granted | ~10 patents per day

Innovation - Support the American high growth entrepreneurial ecosystem

\$4m Accelerator Program | Start-Up America | Demo Days | Crowdfunding

Goals of the SBIR/STTR Program

- ▶ Meet **Federal research and development needs**
- ▶ Increase private-sector **commercialization** of innovations derived from Federal research and development funding
- ▶ Stimulate technological **innovation**
- ▶ Foster and encourage participation in innovation and entrepreneurship by **socially and economically disadvantaged persons**

History of the Program

- ▶ Created by Roland Tibbetts at the National Science Foundation and signed as a Federal wide program in 1982 by Ronald Reagan
- ▶ SBIR programs have awarded over \$40 billion to research-intensive American small businesses
- ▶ The 450,000 engineers and scientists involved are one of the largest STEM talent concentrations in the world
- ▶ 11 Federal Agencies participate annually in program

The SBIR & STTR Programs

SBIR/STTR Success Stories

Qualcomm	Symantec
iRobot	Genzyme
Nimble Systems	NanoMech
Lift Labs	Adaptec
Ecovative Design	Children's Progress Inc
JENTEK Sensors	SQUID

Small Business Innovation Research (SBIR)

- ▶ A set-aside program for small business to engage in Federal R&D – with potential for commercialization
- ▶ 2.9% of Federal agencies Extramural R&D budgets greater than \$100M per year (FY 2015 ~ \$2.0-2.5 Billion in summation of 11 participating agencies) . Growing to 3.2% by 2017.

Small Business Technology Transfer (STTR)

- ▶ A sister set-aside program to facilitate cooperative R&D between small business concerns and U.S. research institutions – with potential for commercialization.
- ▶ 0.35% of the extramural research budget (>\$250 million) for all agencies with a budget greater than \$1B per year. Growing to .4% by 2017.

Milestone-Driven Award Process

Phase I | Feasibility Study or Prototype

- ▶ ~\$150 thousand and 6 months

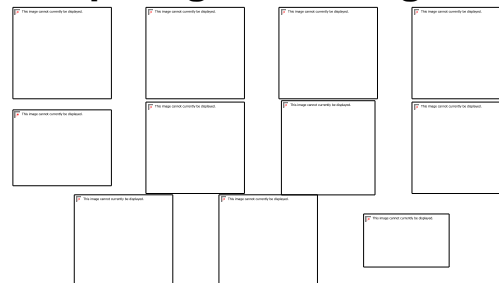

Phase II | Full Research and Development Effort

- ▶ ~\$1 million and 24 months

Phase III | Commercialization Effort

- ▶ Private and Non-SBIR Allocated financing

Participating Federal Agencies

SBIR & STTR in Brief

Quick Stats

FY 2014 in total ~ \$2.4 Billion Obligated

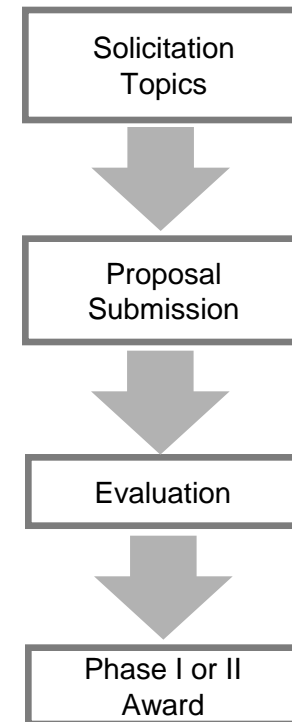

SBIR

- ▶ 4805 Total Awards
- ▶ Phase I Awards | 67% of Awards | 26% of Funds | Average Size \$158,304
- ▶ Phase II Awards | 33% of Awards | 74% of Funds | Average Size \$919,943
- ▶ 23% to women-owned, minority-owned or HUBZone-located small biz
- ▶ 2.5% pre-2011 | 3.2% by 2017 | Floor NOT Cap

STTR

- ▶ 706 Total Awards
- ▶ Phase I Awards | 70% of Awards | 33% of Funds | Average Size \$189,530
- ▶ Phase II Awards | 30% of Awards | 67% of Funds | Average Size \$862,820
- ▶ 20% to women-owned, minority-owned or HUBZone-located small biz
- ▶ 0.3% pre-2011 | 0.6% by 2017 | Floor NOT Cap

Typical Application Process

Estimated SBIR/STTR Budgets by Agency, FY2015

**~ \$2.5 B in FY15
across all agencies**

Agencies with SBIR and STTR Programs	Budget
Department of Defense (DOD)	\$ 1.070 B
Department of Health and Human Services (HHS), including the National Institutes of Health (NIH)	\$797.0 M
Department of Energy (DOE), including Advanced Research Projects Agency – Energy (ARPA-E)	\$206.1 M
National Aeronautics and Space Administration (NASA)	\$ 180.1 M
National Science Foundation (NSF)	\$176.0 M
Agencies with SBIR Programs	Budget
U.S. Department of Agriculture (USDA)	\$20.3 M
Department of Homeland Security (DHS): Science and Technology Directorate (S&T) and Domestic Nuclear Detection Office (DNDO)	\$17.7 M
Department of Commerce: National Oceanic and Atmospheric Administration (NOAA) and National Institute of Standards and Technology (NIST)	\$8.4 M
Department of Transportation (DOT)	\$7.9 M
Department of Education (ED)	\$7.5 M
Environmental Protection Agency (EPA)	\$4.2 M

Snapshot Across the US for the Past 4 Fiscal Years

Top total award dollars went primarily to 10 states:
CA, MA, VA, MD, NY, CO, TX, PA, OH and FL

Federal & State Technology (FAST) Partnership Program

- ▶ FAST provides funding to a build a community whose mission is to provide SBIR and STTR awareness and support to science and technology-driven small businesses
- ▶ About \$2 million annual funding, ~\$100,000 per applicant. Only one applicant allowed per state and must be supported by the Governor
- ▶ Particular emphasis on helping socially and economically disadvantaged firms compete in the SBA's SBIR and STTR programs

Case Studies – Just Scratching The Surface

FROM A COMPANY PERSPECTIVE

IDA-STPI studied NSF's role in 3D Printing (along with leadership from NASA, DOD, etc...) shows that some of most crucial parts of the technology was financed via the SBIR/STTR program. Z-Corporation which emanated out of **MIT** labs and was recently acquired by 3D Systems, was one of the first 3D Printing companies to enter the market dating back to 1994 and receiving initial financing from NSF through various research financing opportunities including the SBIR/STTR program.

Emanating from upstate NY, founded by two undergraduate students at **Rensselaer Polytechnic Institute**, came up with the idea to use mushrooms as the binding material for composite fabrication of biodegradable materials which in turn offer a promising solution to potentially eliminate petrol-based composites. They received some of their earliest funding via EPA and NSF SBIR Grants.

What Does a SBIR/STTR firm or Entrepreneur Look Like?

- ▶ Doesn't have to have yet formed the company
- ▶ Company must be for profit, US owned and operated, and under 500 people
- ▶ Typically they are primarily a R&D organization both in what they do and their staff. Average firm size is 9. As they get larger (over 30) you see balance or product development and sales in addition to R&D
- ▶ Focus is on performing R&D – Not for purchasing equipment, commercializing a technology that has already been developed, or one that has very low risk and only needs capital

What makes a Great SBIR/STTR Proposal?

- ▶ Evaluation Criteria addresses
 - ▶ How well proposal addresses topic area
 - ▶ Skills of PI and Team
 - ▶ Potential to Commercialize
- ▶ Strong proposal hits all of these, provides clear details on how/why the approach address the Agencies need; Skills of the team; and describes how the firm will move the technology through the Phase's and commercialize the technology in the way that Agency wants them to
- ▶ Understanding needs of the Agency and talking to topic authors before submission is extremely **valuable**
- ▶ Use SBIR.Gov and local resources to help you
